PyGameMaker — Tutorial 1: First Steps — Worksheet

Name: _____ Date: _____

Do this worksheet after you have finished the tutorial and pressed **F5** at least once. Answer in full sentences where you can. There are no trick questions.

Part A: Words

Match each word with what it means. Write the letter next to the number.

1. Asset ____
2. Sprite ____
3. Object ____
4. Room ____

- **A.** A level or screen where objects are placed
- **B.** Anything in your project: a sprite, a sound, an object or a room
- **C.** What actually appears and behaves in the game
- **D.** An image (or animation) used to draw something on the screen

Part B: The screen

Name the part of the window where you would go to do each job.

1. Find every sprite, object and room in your project: _____
2. Draw a picture for your character: _____
3. Change the settings of the thing you have selected: _____
4. Click the green triangle to try the game: _____

Part C: Think about it

1. Why did your object appear in the game only after you put it in a room?

2. Your character shows up as nothing when you press F5. Write two things you could check.

3. Did your object move when you pressed the arrow keys? Why or why not?

Part D: Try it

- [ ] I made a new project and saved it where I can find it again
- [ ] I created a sprite named spr_player
- [ ] I created an object named obj_player and gave it that sprite
- [ ] I renamed the room room_game and placed my object in it
- [ ] I pressed **F5** and saw my object

Part E: Look back

1. The part I found easiest: _____
2. The part I found hardest: _____
3. One thing I want my game to do next: _____
