PyGameMaker — Tutorial 6: Maze — Worksheet

Name: _____ Date: _____

Do this worksheet after you have played your finished maze game.

Part A: Words

Match each word with what it means. Write the letter next to the number.

1. Solid ____
2. Collectible ____
3. Exit ____
4. Snap to Grid ____

- **A.** An object that ends or advances the level
- **B.** An object that disappears when the player touches it
- **C.** Placing objects exactly on a regular grid
- **D.** An object that blocks movement

Part B: Which object?

Write which object each rule belongs to.

1. Sets the horizontal speed to 4 while the right arrow is held: _____
2. Adds 10 to the score and disappears when touched: _____
3. Shows "You Win!" and restarts the room: _____
4. Draws "Score: ..." on the screen: _____
5. Stops the player from walking through it: _____

Part C: Think about it

1. The player moves 4 pixels per step and a corridor is 32 pixels wide. How many steps does it take to cross one tile?

2. After you reach the exit, the room restarts. What comes back, and what happens to the score? Which event makes that happen?

3. Your friend's player gets stuck at the entrance of every corridor. What do you check first?

Part D: Try it

- [ ] The player stops at walls and when I let go of the keys
- [ ] Every coin gives 10 points and disappears
- [ ] The exit shows "You Win!" and restarts the room
- [ ] The score is displayed and starts at 0 again
- [ ] My maze can be solved and every coin can be reached

Part E: Look back

1. What I am proudest of: _____
2. A bug I found and fixed: _____
3. What I would add next: _____
