PyGameMaker — Tutorial 9: Catch the Coins — Worksheet

Name: _____ Date: _____

Do this worksheet after you have won and lost your game at least once.

Part A: Words

Match each word with what it means. Write the letter next to the number.

1. Win state ____
2. Lose state ____
3. Room transition ____
4. Instance count ____

- **A.** How many copies of an object exist right now
- **B.** Going from one room to another
- **C.** What the game does when the player wins
- **D.** What the game does when the player loses

Part B: Which object and event?

Write the object and the event for each rule.

1. Add 1 to the score when a coin is touched: _____
2. Go to the Game Over room when the enemy is touched: _____
3. Check every step whether any coins are left: _____
4. Bring a fallen coin back to the top: _____
5. Restart the game when SPACE is pressed on the end screen: _____

Part C: Think about it

1. The Step event checks "count of obj_coin equals 0" every step. What would happen if you placed no coins in the room?

2. You miss a coin and it falls off the bottom of the screen. If nothing brings it back, can you still win? Explain.

3. You want a coin worth 5 points. Which action would you change, and where?

Part D: Try it

- [ ] The player moves and stops
- [ ] Coins and the enemy fall and come back at the top when missed
- [ ] Catching a coin adds 1 and removes the coin
- [ ] Touching the enemy shows Game Over; SPACE starts again
- [ ] Catching every coin shows YOU WIN!

Part E: Look back

1. What I am proudest of: _____
2. A bug I found and fixed: _____
3. What I would add next: _____
