PyGameMaker — Tutorial 10: Turn-Based Multiplayer — Worksheet

Name: _____ Date: _____

Do this worksheet after you have played a full game with a partner.

Part A: Words

Match each word with what it means. Write the letter next to the number.

1. Host ____
2. Shared folder ____
3. Shared variable ____
4. Round ____

- **A.** One turn of the game, resolved by the host
- **B.** A folder both computers can read and write
- **C.** The computer that runs the game and decides each round
- **D.** A value every player can read as global.name

Part B: Which action?

Write the action for each job.

1. Start a game for someone else to join: _____
2. Write your mark into a cell so the other player can see it: _____
3. Tell the game that your move is finished: _____
4. Stop this computer's session cleanly: _____
5. Do something when the host has confirmed the round: _____

Part C: Think about it

1. This game uses files in a shared folder and not a direct network connection. Give one advantage and one disadvantage.

2. Round 5 is in progress. Whose turn is it (X or O), and how does the game work that out?

3. You click a cell and your mark does not show at once. Why, and how long should you wait?

Part D: Try it

- [ ] I can see the grid and place an X on my own
- [ ] I hosted (or joined) and both screens say who is X and who is O
- [ ] Only the player on turn can place a mark, and the mark shows on both screens
- [ ] Three in a row shows the winner on both screens
- [ ] I can leave the game and start a new one

Part E: Look back

1. What I am proudest of: _____
2. A bug I found and fixed: _____
3. What I would add next: _____
