PyGameMaker — Tutorial 11: 2.5D First Steps — Worksheet

Name: _____ Date: _____

Do this worksheet after you have walked around your first-person room.

Part A: Words

Match each word with what it means. Write the letter next to the number.

1. Camera ____
2. Facing angle ____
3. Field of view ____
4. Cell size ____

- **A.** The size of one grid cell that walls must sit on
- **B.** The direction you look, in degrees
- **C.** The object the view is drawn from
- **D.** How wide the view is, in degrees

Part B: Which setting?

Write the setting or action you would change for each job.

1. Look more to the left when the left arrow is held: _____
2. Walk in the direction you are looking: _____
3. Make far walls disappear sooner: _____
4. Make a dungeon feel darker: _____
5. Turn a block into a wall: _____

Part C: Think about it

1. The player's sprite is never visible in first person. Why does the player object still need a sprite?

2. Your friend's player walks straight through the walls. Give the two things to check.

3. Facing angle 0 is right and 90 is up. Which direction is 180? Which key press makes you walk backwards, and what direction does it use?

Part D: Try it

- [ ] My room shows in the first person
- [ ] The arrow keys turn and walk me
- [ ] I cannot leave the room or walk through the inner blocks
- [ ] I changed the field of view and saw the difference
- [ ] I changed the colours

Part E: Look back

1. What I am proudest of: _____
2. A bug I found and fixed: _____
3. What I would add next: _____
