PyGameMaker — Tutorial 12: 2.5D Textures, Sky and Floor — Worksheet

Name: _____ Date: _____

Do this worksheet after you have dressed up your room.

Part A: Words

Match each word with what it means. Write the letter next to the number.

1. Texture ____
2. Panorama ____
3. Tile ____
4. Fallback colour ____

- **A.** A small picture repeated over an area
- **B.** The plain colour used when a texture is empty
- **C.** A sprite used to cover a wall, floor or ceiling
- **D.** A wide picture that wraps around you

Part B: Which setting?

Write the setting you would change for each job.

1. Cover the walls with bricks: _____
2. Add a sky that slides when you turn: _____
3. Tile the floor with flagstones: _____
4. Get flat wall colours back without deleting the texture: _____
5. Make the game run faster by making the floor blockier: _____

Part C: Think about it

1. You set a Sky Texture and a Ceiling Texture. Which one do you see, and why?

2. Why is a floor tile the size of one grid cell (32×32) a good choice?

3. Your friend's walls are still plain red although they set a Wall Texture. Give two things to check.

Part D: Try it

- [ ] My walls show a brick (or other) texture
- [ ] The sky slides when I turn and stays put when I walk
- [ ] The floor is tiled
- [ ] I tried the fallback colours (empty texture, Textured Walls off)
- [ ] I changed Columns or Floor Detail and saw the effect

Part E: Look back

1. What I am proudest of: _____
2. A bug I found and fixed: _____
3. What I would add next: _____
