PyGameMaker — Tutorial 16: Fruit Basket — Worksheet

Name: _____ Date: _____

Do this worksheet after you have won the game at least once.

Part A: Words

Match each word with what it means. Write the letter next to the number.

1. Collision ____
2. Instance count ____
3. Restart Room ____
4. Step event ____

- **A.** An action that puts the current room back exactly how it started
- **B.** How many copies of an object exist right now
- **C.** An event that fires the moment two objects touch
- **D.** An event that runs every single frame of the game, over and over

Part B: Which object and event?

Write the object and the event for each rule.

1. Add 10 to score and remove the fruit when caught: _____
2. Restart the room when a bomb is touched: _____
3. Check if every fruit has been collected: _____
4. Show the YOU WIN! message: _____
5. Restart the game when SPACE is pressed on the win screen: _____

Part C: Think about it

1. Why doesn't obj_fruit need any events of its own?

2. What would happen if the Step event's win check used obj_bomb instead of obj_fruit?

3. Why is it important that the bombs are placed far away from the fruit?

Part D: Try it

- [ ] The basket moves and stops
- [ ] The fruit and bombs sit still until the basket reaches them
- [ ] Catching a fruit adds 10 to the score and makes it disappear
- [ ] Touching a bomb restarts the room
- [ ] Collecting every fruit shows YOU WIN!

Part E: Look back

1. What I am proudest of: _____
2. A bug I found and fixed: _____
3. What I would add next: _____
