

PyGameMaker — Tutorial 6: Maze — Answer Key

For teachers only do not hand out to students. The numbering below matches this tutorial's Worksheet.

Worksheet Answer Key

Part A: 1-D, 2-B, 3-A, 4-C. **Part B:** 1. obj_player. 2. obj_coin. 3. obj_exit. 4. obj_game_controller. 5. obj_wall (because it is Solid). **Part C:**

- 1 32 ÷ 4 = 8 steps.
- 2 The room starts again, so all the coins come back, and the score goes back to 0 because the controller's Create event runs again and sets it.
- 3 Whether the player and the walls were placed on the grid (Snap to Grid 32×32).

Parts D and E: completion and reflection.
